

## Chamfering CH200

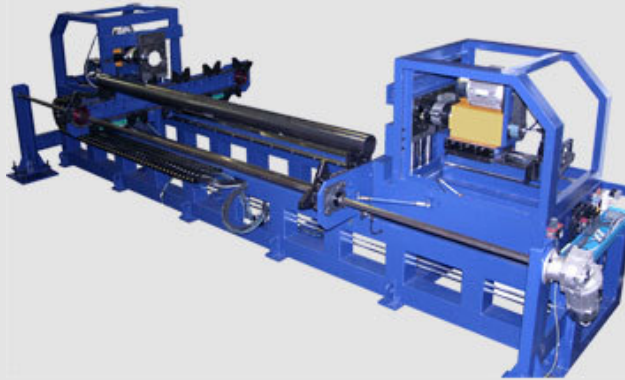

photo: Chamfering CH200

Five axis CNC controlled chamfering system. Capable to work both tube ends at the same time with 2 channels CNC control system

- feeding system using transport chains
- hydraulic vices to hold the tube in chamfering position
- multiple tool working capability (internal, external, tube face...)
- it's possible to add thread package
- tube length from 350mm up to 12 meters
- working diameter from  $\varnothing 50\text{mm}$  up to  $\varnothing 200\text{mm}$
- automatic chip conveyor
- connectable to the entire OMP cutting lines production
- CAD/CAM software connection enabled
- 15" touch panel with Xp Embedded operating system
- industrial Ethernet enabled
- built-in remote assistance package
